SUBJECT INDEX

Acanthaceae
the effects of stress and disturbance on proximate composition, allocation of production, photosynthesis, respiration, and chlorophyll levels in *Hygrophila polysperma* (Roxb.) Anders. ( ) 479
Acidic
cloud deposition; CO_2 exchange rates of red spruce during the second season of exposure to ozone and 115
deposition, wet and dry; foliar injury responses of ponderosa pine seedlings to ozone, drought, and 101
Adaptations
structural diversity and ; in some Mediterranean evergreen sclerophyllous species 295
Air temperature
responses of gas exchange and phototropic leaf orientation in soybean to soil water availability, leaf water potential, photosynthetic photon flux, and 153
Alga, green
changes in polyamine and glutathione contents of a , *Chlorogonium elongatum* (Dang.) France exposed to mercury 145
effects of supplemental u.v.-B radiation on photosynthetic pigment, protein and glutathione contents of 137
Allocation
of production; the effects of stress and disturbance on proximate composition, photosynthesis, respiration, chlorophyll levels and , in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Alpine
plants, crowns of; morphological causes for the retention of precipitation in the 319
Aluminium
effects of pH and, on growth of *Galium odoratum* (L.) Scop. in flowing solution culture 497
signalling mechanisms; the use of lanthanum to delineate the , functioning in the roots of *Zea mays* L. 365
stress; modelling the interactive effects of cadmium, manganese, nickel, zinc and, using the Weibull frequency distribution 281
Anatomy, leaf
relationships between, and ozone sensitivity of *Fraxinus pennsylvanica* Marsh and *Prunus serotina* Ehrh. 33
Anions
effect of low pH, heavy metals and, on chlorophyll degradation in the lichen *Ramalina duriaei* (De Not.) Bagl. 229
Astrophytum (Cactaceae)
gaseous and liquid phase water uptake by the stem surface of 75
Bacterial canker disease, citrus
enzymatic activities of citrus leaves from plants resistant and susceptible to 465
Bark, isolated
sorption and permeation characteristics of bark. Penetration of K_2HPO_4 and water through (French; English Abstract) 11
Barley grain production
NO_2 and SO_2 mixtures stimulate, but depress clover growth 185
Barley seeds, dry
post-irradiation modification of oxygen-, nitrogen-, and nitrous oxide-mediated damage in , by catalase and superoxide dismutase: influence of post-hydration temperature 329
Bean plants, responses of
to nitrogen dioxide; the influence of benzyladenine and nitrogen sources on, ... 273
Benzyladenine
the influence of nitrogen sources and , on responses of bean plants to nitrogen dioxide 273
Biochemical and histological differences
of slightly and severely injured spruce needles of two stands in Northrhine Westphalia 163
Bromeliads, epiphytic
effects of ozone and sulfur dioxide on four 25
Browning, epidermal
of saguaro cacti (*Carnegiea gigantea*): is it new or related to direction? 357
Cacti, saguaro (*Carnegiea gigantea*)
epidermal browning of , : is it new or related to direction? 357
Cadmium
effects of lead, zinc and , on the electric membrane potential at the xylem/symplast interface and cell elongation of *Impatiens balsamina* 439
stress; modelling the interactive effects of aluminum, manganese, nickel, zinc and , using the Weibull frequency distribution 281

Callus growth, protoplast-derived
average tissue diameter as a non-destructive determinant of potato, ... 43
Canker disease, citrus bacterial
enzymatic activities of citrus leaves from plants resistant and susceptible to 465
Canopy gas exchange
measurement of, of kiwi fruit vines using a suite of whole-canopy cuvettes 425
Capitulum development
a clonal analysis in sunflower (*Helianthus annuus* L.)—I. The 505
Carbon-14, uptake of
by plant roots; physiological conditions and, ... 203
Carbon dioxide, elevated
root and shoot weight in a tallgrass prairie under 193
Carnegiea gigantea
epidermal browning of saguaro cacti ( ): is it new or related to direction? 357
Catalase
post-irradiation modification of oxygen-, nitrogen-, and nitrous oxide-mediated damage in dry barley seeds by superoxide dismutase and ; : influence of post-hydration temperature 329
Cell cycle
duration in tobacco cells adapted to NaCl 1
Cell elongation
effects of lead, cadmium and zinc on the electric membrane potential at the xylem/symplast interface and , of *Impatiens balsamina* 439
Cells, cultured, rose
Phytophthora elicitor inhibits ferricyanide reduction by 487
Cells, tobacco
adapted to NaCl; cell cycle duration in 1
Chilled and non-chilled
zucchini squash; differences in nuclear magnetic resonance images between 213
Chilling
photosynthetic responses of rough lemon and sour orange to soil flooding, short-term temperature fluctuations and , during growth 471
Chlorogonium elongatum (Darg.) France
changes in polyamine and glutathione contents of a green alga, exposed to mercury 145
Chlorophyll *a*
fluorescence; of NO_3-fed vs N-fixing soybean grown under two water treatments 343
Chlorophyll degradation
in the lichen *Ramalina duriaei* (De Not) Bagl.; effect of low pH, heavy metals and anions on, ... 229
Chlorophyll levels
the effects of stress and disturbance on proximate composition, allocation of production, photosynthesis, respiration and , in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Chlorophylls *a* and *b*
in lichens and higher plants; a reappraisal of the use of DMSO for the extraction and determination of 85
Chloroplast DNA damage
effect of gamma-irradiation on protoplast viability and , in *Lycopersicon peruvianum* with respect to donor–recipient protoplast fusion 255
Chloroplasts, mesophyll cell
of spruce needles exposed to O_3, SO_2 and NO_2 alone and in combination; ultrastructure of 243
Citrus bacterial canker disease
enzymatic activities of citrus leaves from plants resistant and susceptible to 465
Citrus leaves
from plants resistant and susceptible to citrus bacterial canker disease; enzymatic activities of 465
Clonal analysis
in sunflower (*Helianthus annuus* L.)—I. The capitulum development 505
Clones of strawberry
reciprocal transplant study of , proliferating in an irradiation field: morphometrics 383
Clover growth
NO_2 and SO_2 mixtures stimulate barley grain production but depress, ... 185
Cloud deposition, acidic
CO_2 exchange rates of red spruce during the second season of exposure to ozone and 115
CO_2, elevated
Fraser fir gas exchange and growth in response to 351

CO_2 exchange rates
of red spruce during the second season of exposure to ozone and acidic cloud deposition 115
Conductance, hydraulic
temperature effects on cotton root 49
Composition, proximate
the effects of stress and disturbance on photosynthesis, respiration, chlorophyll levels, allocation of production and, in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Cotton root
hydraulic conductance; temperature effects on 49
Culture, flowing solution
effects of pH and aluminum on growth of *Galium odoratum* (L.) Scop. in 497
Cuvettes, whole canopy
measurement of canopy gas exchange of kiwi fruit vines using a suite of 425
Cycle, cell
duration in tobacco cells adapted to NaCl 1
Determinant, non-destructive
average tissue diameter as a , potato protoplast-derived callus growth 43
Development, capitulum
a clonal analysis in sunflower (*Helianthus annuus* L.)—I. The 505
Diameter, average tissue
as a non-destructive determinant of potato protoplast-derived callus growth 43
Disease, citrus bacterial canker
enzymatic activities of citrus leaves from plants resistant and susceptible to 465
Dispersal, soredial
from individual soralia in the lichen *Hypogymnia physodes* (L.) Nyl. 55
Disturbance and stress
the effects of , on proximate composition, allocation of production, photosynthesis, respiration, and chlorophyll levels in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Diversity, structural
and adaptations in some Mediterranean evergreen sclerophyllous species 295
DMSO
for the extraction and determination of chlorophylls *a* and *b* in lichens and higher plants; a reappraisal of the use of 85
DNA damage, chloroplast
effect of gamma-irradiation on protoplast viability and , in *Lycopersicon peruvianum* with respect to donor–recipient protoplast fusion 255
Dormancy regulation
concepts of; in vegetative plant propagules: a review 309
Drought
foliar injury responses of ponderosa pine seedlings to ozone, wet and dry acidic deposition, and 101
Eastern white pine
early effects of hydrogen fluoride on water relations, photosynthesis and membrane integrity in, (*Pinus strobus*) seedlings 377
Effects, interactive
modelling the , of aluminum, cadmium, manganese, nickel and zinc stress using the Weibull frequency distribution 281
Electric fields, 60-Hz
inhibit electrogenic ion pumping in *Nitella clavata* 65
Electrogenic ion pumping
60-Hz electric fields inhibit, in *Nitella clavata* 65
Electron transport
assessing the influence of exogenous ethylene on fluorescence quenching and, in leaves of *Glycine max* 449
Elevated CO_2
Fraser fir seedling gas exchange and growth in response to 351
Elicitor, *Phytophthora*
inhibits ferricyanide reduction by cultured rose cells 487
Elongation, cell
effects of lead, cadmium and zinc on the electric membrane potential at the xylem/symplast interface and, of *Impatiens balsamina* 439
Enzymatic activities
of citrus leaves from plants resistant and susceptible to citrus bacterial canker disease 465

Epidermal browning
of saguaro cacti (*Carnegiea gigantea*): is it new or related to direction? 357
Epiphytic bromeliads
effects of ozone and sulfur dioxide on four 25
Ethylene,
exogenous; assessing the influence of , on electron transport and fluorescence quenching in leaves of *Glycine max* 449
Evergreen, Mediterranean
sclerophyllous species; structural diversity and adaptations in some 295
Extraction and determination
of chlorophylls *a* and *b* in lichens and higher plants; a reappraisal of the use of DMSO for the 85
Ferricyanide reduction
Phytophthora elicitor inhibits, by cultured rose cells 487
Field, irradiation
reciprocal transplant study of clones of strawberry proliferating in an , : morphometrics 383
Fields, 60-Hz
inhibit electrogenic ion pumping in *Nitella clavata* 65
Fir seedling, Fraser
gas exchange and growth in response to elevated CO_2 351
Flooding, soil
photosynthetic responses of rough lemon and sour orange to chilling, short-term temperature fluctuations and , during growth 471
Flowing solution culture
effects of pH and aluminium on growth of *Galium odoratum* (L.) Scop. in 497
Fluorescence, chlorophyll *a*
of NO_3-fed vs N-fixing soybean grown under two water treatments 343
Fluorescence quenching
assessing the influence of exogenous ethylene on electron transport and , in leaves of *Glycine max* 449
Flux, photon photosynthetic
responses of gas exchange and phototropic leaf orientation in soybean to soil water availability, leaf water potential, air temperature, and 153
Foliar injury responses
of ponderosa pine seedlings to ozone, wet and dry acidic deposition, and drought 101
Foliar surfaces of wheat
retention, loss and translocation of radionuclides applied to 391
Foliose lichen
a comparison of the growth curves of the , *Parmelia conspersa* determined by a cross-sectional study and by direct measurement 221
Fraser fir seedling
gas exchange and growth in response to elevated CO_2 351
Fraxinus pennsylvanica Marsh.
relationships between leaf anatomy and ozone sensitivity of *Prunus serotina* Ehrh. and , ... 33
Frequency distribution, Weibull
modelling the interactive effects of aluminum, cadmium, manganese, nickel and zinc stress using the 281
Fusion, protoplast
effects of gamma-irradiation on protoplast viability and chloroplast DNA damage in *Lycopersicon peruvianum* with respect to donor–recipient 255
Galium odoratum (L.) Scop.
effects of pH and aluminium on growth of , in flowing solution culture 497
Gamma-irradiation
effects of ; on protoplast viability and chloroplast DNA damage in *Lycopersicon peruvianum* with respect to donor–recipient protoplast fusion 255
effect of ; on the membrane permeability and lipid composition of potato tubers 265
Gas exchange,
canopy; measurement of , of kiwi fruit vines using a suite of whole-canopy cuvettes 425
Fraser fir seedling growth and , in response to elevated CO_2 351
parameters; effects of water deficit on ribulose 1,5-bisphosphate carboxylase activation and , in wheat 403
responses of , and phototropic leaf orientation in soybean to soil water availability, leaf water potential, air temperature, and photosynthetic photon flux 153
Gaseous and liquid phase water uptake
by the stem surface of *Astrophytum* (Cactaceae) 75

Glutathione and polyamine contents
changes in , of a green alga *Chlorogonium elongatum* (Dang) France exposed to mercury 145
Glutathione contents
effects of supplemental u.v.-B radiation on photosynthetic pigment, protein and , in green algae 137
Glycine max
assessing the influence of exogenous ethylene on electron transport and fluorescence quenching in leaves of 449
Grain production, barley
NO_2 and SO_2 mixtures stimulate, but depress clover growth 185
Green alga
changes in polyamine and glutathione contents of a , *Chlorogonium elongatum* (Dang) France exposed to mercury 145
effects of supplemental u.v.-B radiation on photosynthetic pigment, protein and glutathione contents of 137
Growth, callus
average tissue diameter as a non-destructive determinant of potato protoplast-derived 43
Growth, clover
NO_2 and SO_2 mixtures stimulate barley grain production but depress, ... 185
Growth curves
of the foliose lichen *Parmelia conspersa* determined by a cross-sectional study and by direct measurement; a comparison of the 221
Growth
Fraser fir seedling gas exchange and, in response to elevated CO_2 351
of *Galium odoratum* (L.) Scop. effects of pH and aluminium on , in flowing solution culture 497
photosynthetic responses of rough lemon and sour orange to soil flooding, chilling and short-term temperature fluctuations during 471
Heat shock
inhibition and recovery of photosystem II following exposure of wheat to , ... 125
Heavy metals
effect of low pH, anions and , on chlorophyll degradation in the lichen *Ramalina duriaei* (De Not.) Bagl. 229
Helianthus annuus L.
a clonal analysis in sunflower ( )—I. The capitulum development 505
Higher plants
and lichens; a reappraisal of the use of DMSO for the extraction and determination of chlorophylls *a* and *b* in 85
Histological and biochemical differences
of slightly and severely injured spruce needles of two stands in Northrhine Westphalia 163
Hydraulic conductance
temperature effects on cotton root 49
Hydrogen fluoride
early effects of, on water relations, photosynthesis and membrane integrity in eastern white pine (*Pinus strobus*) seedlings 377
Hygrophila polysperma (Roxb.) Anders.
the effects of stress and disturbance on proximate composition, allocation of production, photosynthesis, respiration, and chlorophyll levels in , (Acanthaceae) 479
Hypogymnia physodes (L.) Nyl.
soredial dispersal from individual soralia in the lichen 55
Impatiens balsamina
effects of lead, cadmium and zinc on the electric membrane potential at the xylem/symplast interface and cell elongation of 439
Inhibition and recovery
of photosystem II following exposure of wheat to heat shock 125
Injured spruce needles
histological and biochemical differences of slightly and severely , of two stands in Northrhine Westphalia 163
Injury responses, foliar
of ponderosa pine seedlings to ozone, wet and dry deposition, and drought 101
Interactive effects,
modelling the; of aluminum, cadmium, manganese, nickel and zinc stress using the Weibull frequency distribution 281
Ion pumping, electrogenic
60-Hz electric fields inhibit, in *Nitella clavata* 65
Irradiation field
reciprocal transplant study of clones of strawberry proliferating in an , : morphometrics 383
Irradiation, gamma
effect of, on protoplast viability and chloroplast DNA damage in *Lycopersicon peruvianum* with respect to donor–recipient protoplast fusion 255
effect of, on the membrane permeability and lipid composition of potato tubers 265

Isolated bark
sorption and permeation characteristics of bark. Penetration of K_2HPO_4 and water through (French; English Abstract) 11
K_2HPO_4
and water through isolated bark. Sorption and permeation characteristics of bark (French; English Abstract) 11
Kiwi fruit vines
measurement of canopy gas exchange of , using a suite of whole-canopy cuvettes 425
Lake macrophytes
peroxidase activity in , and its relation to pollution tolerance 457
Lanthanum
the use of , to delineate the aluminium signalling mechanisms functioning in the roots of *Zea mays* L. 365
Lead
effects of cadmium, zinc and , in the electric membrane potential at the xylem/symplast interface and cell elongation in *Impatiens balsamina* 439
Leaf anatomy
relationships between , and ozone sensitivity of *Fraxinus pennsylvanica* Marsh. and *Prunus serotina* Ehrh. 33
Leaf orientation, phototropic
responses of gas exchange and , in soybean to soil water availability, leaf water potential, air temperature, and photosynthetic photon flux 153
Leaf water potential
responses of gas exchange and phototropic leaf orientation in soybean to soil water availability, photosynthetic photon flux, air temperature, and 153
Leaves, citrus
from plants resistant and susceptible to citrus bacterial canker disease; enzymatic activities of 465
Leaves of *Glycine max*
assessing the influence of exogenous ethylene on electron transport and fluorescence quenching in 449
Lemon, rough
photosynthetic responses of sour orange and, to soil flooding, chilling and short-term temperature fluctuations during growth 471
Lichen
chlorophyll degradation in the ; effect of low pH, heavy metals and anions on, *Ramalina duriaei* (De Not.) Bagl. 229
foliose; a comparison of the growth curves of the , *Parmelia conspersa* determined by a cross-sectional study and by direct measurement 221
Hypogymnia physodes (L.) Nyl.; soredial dispersal from individual soralia in the 55
Lichens
and higher plants; a reappraisal of the use of DMSO for the extraction and determination of chlorophylls *a* and *b* in 85
Lipid composition
effect of gamma-irradiation on the membrane permeability and, of potato tubers 265
Liquid phase and gaseous water uptake
by the stem surface of *Astrophytum* (Cactaceae) 75
Loss of radionuclides
retention, translocation and, applied to foliar surfaces of wheat 391
Lycopersicon peruvianum
effect of gamma-irradiation on protoplast viability and chloroplast DNA damage in, with respect to donor–recipient protoplast fusion 255
Macrophytes, lake
peroxidase activity in , and its relation to pollution tolerance 457
Manganese stress
modelling the interactive effects of aluminum, cadmium, nickel, zinc and , using the Weibull frequency distribution 281
Mechanisms, aluminium signalling
the use of lanthanum to delineate the , functioning in the roots of *Zea mays* L. 365
Mediterranean evergreen
sclerophyllous species ; structural diversity and adaptations in some 295
Membrane integrity
early effects of hydrogen fluoride on water relations, photosynthesis and , in eastern white pine (*Pinus strobus*) seedlings 377
Membrane permeability
effect of gamma-irradiation on the lipid composition and , of potato tubers 265

Membrane potential, electric
effects of lead, cadmium and zinc on the , at the xylem/symplast interface and cell elongation of *Impatiens balsamina* 439
Mercury
changes in polyamine and glutathione contents of a green alga, *Chlorogonium elongatum* (Dang) France exposed to 145
Mesophyll cell chloroplasts
of spruce needles exposed to O_3, SO_2 and NO_2 alone and in combination; ultrastructure of 243
Metals, heavy
effect of low pH, anions and, on chlorophyll degradation in the lichen *Ramalina duriaei* (De Not.) Bagl. 229
Modelling
the interactive effects of aluminum, cadmium, manganese, nickel and zinc stress using the Weibull frequency distribution 281
Morphological
causes for the retention of precipitation in the crowns of alpine plants 319
Morphometrics
reciprocal transplant study of clones of strawberry proliferating in an irradiation field: 383
NaCl
cells adapted to; cell cycle duration in tobacco 1
Needles, spruce
histological and biochemical differences of slightly and severely injured , of two stands in Northrhine Westphalia 163
Needles, spruce
ultrastructure of mesophyll cell chloroplasts of , exposed to O_3, SO_2 and NO_2 alone and in combination 243
Nickel stress
modelling the interactive effects of aluminum, cadmium, manganese, zinc and , using the Weibull frequency distribution 281
Nitella clavata
60-Hz electric fields inhibit electrogenic ion pumping in 65
Nitrogen dioxide
the influence of benzyladenine and nitrogen sources on the responses of bean plants to , ... 273
Nitrogen-,
oxygen-, and nitrous oxide-mediated damage; post-irradiation modification of, in dry barley seeds by catalase and superoxide dismutase: influence of post-hydration temperature 329
Nitrogen sources
the influence of benzyladenine and , on responses of bean plants to nitrogen dioxide 273
Nitrous oxide-, nitrogen-, and oxygen-mediated damage
post-irradiation modification of , in dry barley seeds by catalase and superoxide dismutase: influence of post-hydration temperature 329
N_2-fixing vs NO_3-fed soybean
chlorophyll *a* fluorescence of , grown under two water treatments 343
NO_2
ultrastructure of mesophyll cell chloroplasts of spruce needles exposed to O_3, SO_2, and , alone and in combination 243
NO_2 and SO_2
mixtures stimulate barley grain production but depress clover growth 185
NO_3-fed vs N_2-fixing soybean
chlorophyll *a* fluorescence of , grown under two water treatments 343
Northrhine Westphalia
histological and biochemical differences of slightly and severely injured spruce needles of two stands in 163
Nuclear magnetic resonance images
differences in , between chilled and non-chilled zucchini squash 213
Ozone
CO_2 exchange rates of red spruce during the second season of exposure to acidic cloud deposition and 115
foliar injury responses of ponderosa pine seedlings to wet and dry acidic deposition, drought, and 101
effects of ; and sulfur dioxide on four epiphytic bromeliads 25
Ozone sensitivity
relationships between leaf anatomy and , of *Fraxinus pennsylvanica* Marsh. and *Prunus serotina* Ehrh. 33
O_3
ultrastructure of mesophyll cell chloroplasts of spruce needles exposed to NO_2, SO_2 and , alone and in combination 243

Orange, sour
photosynthetic responses of rough lemon and , to soil flooding, chilling, and short-term temperature fluctuations during growth 471
Orientation, phototropic, leaf
responses of gas exchange and, in soybean to soil water availability, leaf water potential, air temperature, and photosynthetic photon flux 153
Oxygen-,
nitrogen- and nitrous oxide-mediated damage; post-irradiation modification of , in dry barley seeds by catalase and superoxide dismutase: influence of post-hydration temperature 329
Parmelia conspersa
a comparison of the growth curves of the foliose lichen, determined by a cross-sectional study and by direct measurement 221
Permeability, membrane
effect of gamma-irradiation on the lipid composition and , of potato tubers 265
Permeation and sorption characteristics
of bark. Penetration of K_2HPO_3 and water through isolated bark (French; English Abstract) 11
Peroxidase activity
in lake macrophytes and its relation to pollution tolerance 457
pH
effects of aluminum and , on growth of *Galium odoratum* (L.) Scop. in flowing solution culture 497
pH, low
effect of heavy metals, anions and , on chlorophyll degradation in the lichen *Ramalina duriaei* (De Not.) Bagl. 229
Photon flux, photosynthetic
responses of gas exchange and phototropic leaf orientation in soybean to soil water availability, leaf water potential, air temperature, and 153
Photosynthesis
early effects of hydrogen fluoride on water relations, membrane integrity and , in eastern white pine (*Pinus strobus*) seedlings 377
the effects of stress and disturbance on proximate composition, allocation of production, respiration, chlorophyll levels and , in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Photosynthetic photon flux
responses of gas exchange and phototropic leaf orientation in soybean to soil with availability, leaf water potential, air temperature, and 153
Photosynthetic pigment
effects of supplemental u.v.-B radiation on protein, glutathione and , contents in green algae 137
Photosynthetic responses
of rough lemon and sour orange to soil flooding, chilling, and short-term temperature fluctuations during growth 471
Photosystem II
inhibition and recovery of , following exposure of wheat to heat shock 125
Photosystem II 33 kDa protein
modelling of the , : structure, functions and possible sulfate-sensitive sites derived from sequence-encoded information 411
Phototropic leaf orientation
responses of gas exchange and, in soybean to soil water availability, leaf water potential, air temperature, and photosynthetic photon flux 153
Physiological conditions
and uptake of inorganic carbon-14 by plant roots 203
Phytophthora elicitor
inhibits ferricyanide reduction by cultured rose cells 487
Pigment, photosynthetic
effects of supplemental u.v.-B radiation on protein, glutathione and , contents in green algae 137
Pine, eastern white
early effects of hydrogen fluoride on water relations, photosynthesis and membrane integrity of , (*Pinus strobus*) seedlings 377
Pine, ponderosa
foliar injury responses of , seedlings to ozone, wet or dry acidic deposition, and drought 101
Pinus strobus
early effects of hydrogen fluoride on water relations, photosynthesis and membrane integrity in eastern white pine ( ) seedlings 377
Polyamine and glutathione contents
changes in, of a green alga, *Chlorogonium elongatum* (Dang) France exposed to mercury 145

Pollution tolerance
peroxidase activity in lake macrophytes and its relation to 457
Ponderosa pine seedlings
foliar injury responses of , to ozone, wet or dry acidic deposition, and drought 101
Post-hydration temperature
post-irradiation modification of oxygen-, nitrogen-, and nitrous oxide-mediated damage in dry barley seeds by catalase and superoxide dismutase: influence of 329
Post-irradiation modification
of oxygen-, nitrogen- and nitrous oxide-mediated damage in dry barley seeds by catalase and superoxide dismutase: influence of post-hydration temperature 329
Potato
protoplast-derived callus growth; average tissue diameter as a non-destructive determinant of ; 43
Potato tubers
effect of gamma-irradiation on the membrane permeability and lipid composition of , ... 265
Prairie, tallgrass
root and shoot weight in a , under elevated carbon dioxide 193
Precipitation, retention of
in the crowns of alpine plants; morphological causes for the 319
Production, allocation of
the effects of stress and disturbance on proximate composition, photosynthesis, respiration, chlorophyll levels and, in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Production, barley grain
NO_2 and SO_2 mixtures stimulate, but depress clover growth 185
Propagules, vegetative plant
concepts of dormancy regulation in , : a review 309
Protein and glutathione contents
effects of supplemental u.v.-B radiation on photosynthetic pigment and , in green algae 137
Protein, photosystem II 33 kDa
modelling of the , : structure, functions and possible sulfate-sensitive sites derived from sequence-encoded information 411
Protoplast-derived callus growth
average tissue diameter as a non-destructive determinant of potato 43
Protoplast fusion
effect of gamma-irradiation on protoplast viability and chloroplast DNA damage in *Lycopersicon peruvianum* with respect to donor–recipient, ... 255
Protoplast viability
effect of gamma-irradiation on chloroplast DNA damage and , in *Lycopersicon peruvianum* with respect to donor–recipient protoplast fusion 255
Proximate composition
the effects of stress and disturbance on photosystem, respiration, chlorophyll levels, allocation of production and , in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Prunus serotina Ehrh.
relationships between leaf anatomy and ozone sensitivity of *Fraxinus pennsylvanica* Marsh. and 33
Radionuclides
retention, loss and translocation of , applied to foliar surfaces of wheat 391
Ramalina duriaei (De Not.) Bagl.
effect of low pH, heavy metals and anions on chlorophyll degradation in the lichen, ... 229
Reciprocal transplant
study of clones of strawberry proliferating in an irradiation field: morphometrics 383
Red spruce
CO_2 exchange rates of , during the second season of exposure to ozone and acidic cloud deposition 115
Reduction, ferricyanide
Phytophthora elicitor inhibits, by cultured rose cells 487
Regulation, dormancy
concepts of , in vegetative plant propagules: a review 309
Respiration
the effects of stress and disturbances on proximate composition, allocation of production, photosynthesis, chlorophyll levels and , in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
Responses, foliar injury
of ponderosa pine seedlings to ozone, wet or dry acidic deposition, and drought 101

Responses of
gas exchange and phototropic leaf orientation in soybean to soil water availability, leaf water potential, air temperature, and photosynthetic photon flux 153
Retention of radionuclides
loss, translocation and , applied to foliar surfaces of wheat 391
Retention of precipitation
in the crowns of alpine plants; morphological causes for the 319
Review
concepts of dormancy regulation in vegetative plant propagules: a 309
Ribulose 1,5-bisphosphate carboxylase activation
effects of water deficit on gas-exchange parameters and, in wheat 403
Root
and shoot weight in a tallgrass prairie under elevated carbon dioxide 193
Root, cotton
temperature effect on , hydraulic conductance 49
Roots of *Zea mays* L.
the use of lanthanum to delineate the aluminium signalling mechanisms functioning in the 365
Roots, plant
physiological conditions and uptake of inorganic carbon-14 by 203
Rose cells, cultured
Phytophthora elicitor inhibits ferricyanide reduction by 487
Saguaro cacti (*Carnegiea gigantea*)
epidermal browning of , : is it new or related to direction? 357
Sclerophyllous species
Mediterranean evergreen; structural diversity and adaptation in some, ... 295
Seedlings, eastern white pine (*Pinus strobus*)
early effects of hydrogen fluoride on water relations, photosynthesis and membrane integrity 377
Sequence-encoded information
modelling of the photosystem II 33 kDa protein: structure, functions and possible sulfate-sensitive sites derived from 411
Shoot
root and , weight in a tallgrass prairie under elevated carbon dioxide 193
Signalling mechanisms, aluminium
the use of lanthanum to delineate the functioning in the roots of *Zea mays* L. 365
SO_2 and NO_2
mixtures stimulate barley grain production but depress clover growth 185
SO_2
ultrastructure of mesophyll cell chloroplasts of spruce needles exposed to O_3, NO_2 and , alone and in combination 243
Soil flooding
photosynthetic responses of rough lemon and sour orange to chilling, short-term temperature fluctuations and , during growth 471
Soil water availability
responses of gas exchange and phototropic leaf orientation in soybean to leaf water potential, air temperature, photosynthetic photon flux, and 153
Solution culture, flowing
effects of pH and aluminum on growth of *Galium odoratum* (L.) Scop. in 497
Soralia
soredial dispersal from individual , in the lichen *Hypogymnia physodes* (L.) Nyl. 55
Soredial dispersal
from individual soralia in the lichen *Hypogymnia physodes* (L.) Nyl. 55
Sorption and permeation
characteristics of bark. Penetration of K_2HPO_4 and water through isolated bark (French; English Abstract) 11
Soybean
responses of gas exchange and phototropic leaf orientation in, to soil water availability, leaf water potential, air temperature, and photosynthetic photon flux 153
Spruce needles
histological and biochemical differences of slightly and severely injured , of two stands in Northrhine Westphalia 163
ultrastructure of mesophyll cell chloroplasts of , exposed to O_3, SO_2 and NO_2 alone and in combination 243

Spruce, red
CO_2 exchange rates of , during the second season of exposure to ozone and acidic cloud deposition 115
Squash, zucchini
differences in nuclear magnetic resonance images between chilled and non-chilled 213
Strawberry, clones of
reciprocal transplant study of , proliferating in an irradiation field: morphometrics 383
Stem surface
gaseous and liquid phase water uptake by the , of *Astrophytum* (Cactaceae) 75
Stress
and disturbance; the effects of , on proximate composition, allocation of production, photosynthesis, respiration, and chlorophyll levels in *Hygrophila polysperma* (Roxb.) Anders. (Acanthaceae) 479
modelling the interactive effects of aluminum, cadmium, manganese, nickel and zinc , using the Weibull frequency distribution 281
Structural diversity
and adaptations in some Mediterranean evergreen sclerophyllous species 295
Structure
modelling of the photosystem II 33 kDa protein: functions, possible sulfate-sensitive sites and , derived from sequence-encoded information 411
Sulfate-sensitive sites, possible
modelling the photosystem II 33 kDa protein: structure, functions and , derived from sequence-encoded information 411
Sulfur dioxide, effects of
and ozone on four epiphytic bromeliads 25
Sunflower (*Helianthus annuus* L.)
a clonal analysis in , —I. The capitulum development 505
Superoxide dismutase
post-irradiation modification of oxygen-, nitrogen-, and nitrous oxide-mediated damage in dry barley seeds by catalase and ; : influence of post-hydration temperature 329
Symplast/xylem interface
effects of lead, cadmium and zinc on the electric membrane potential at the , and cell elongation of *Impatiens balsamina* 439
Tallgrass prairie
root and shoot weight in a , under elevated carbon dioxide 193
Temperature, air
responses of gas exchange and phototropic leaf orientation in soybean to soil water availability, leaf water potential, photosynthetic flux, and 153
Temperature effects
on cotton root hydraulic conductance 49
Temperature fluctuations, short-term
photosynthetic responses of rough lemon and sour orange to soil flooding, chilling and , during growth 471
Temperature, post-hydration
post-irradiation modification of oxygen-, nitrogen-, and nitrous oxide-mediated damage in dry barley seeds by catalase and superoxide dismutase: influence of 329
Tissue diameter
average; as a non-destructive determinant of potato protoplast-derived callus growth 43
Tobacco cells
adapted to NaCl; cell cycle duration in 1
Translocation of radionuclides
retention, loss and , applied to foliar surfaces of wheat 391
Transplant, reciprocal
study of clones of strawberry proliferating in an irradiation field: morphometrics 383
Tubers, potato
effect of gamma-irradiation on the membrane permeability and lipid composition of 265
Ultrastructure
of mesophyll cell chloroplasts of spruce needles exposed to O_3, SO_2 and NO_2 alone and in combination 243
Uptake
of inorganic carbon-14 by plant roots; physiological conditions and , ... 203
u.v.-B radiation, supplemental
effects of , on photosynthetic pigment protein and glutathione contents of green algae 137
Vegetative plant propagules
concepts of dormancy regulation in , : a review 309

Water availability, soil
responses of gas exchange and phototropic leaf orientation in soybean to leaf water potential, air temperature, photosynthetic photon flux, and 153
Water deficit
effects of , on gas-exchange parameters and ribulose 1,5-bisphosphate carboxylase activation in wheat 403
Water potential, leaf
responses of gas exchange and phototropic leaf orientation in soybean to soil water availability, photosynthetic photon flux, air temperature and 153
Water relations
early effects of hydrogen fluoride on photosynthesis, membrane integrity and , in eastern white pine (*Pinus strobus*) seedlings 377
Water treatments
chlorophyll *a* fluorescence of NO_3-fed vs N_2-fixing soybean grown under two 343
Water uptake
gaseous and liquid phase , by the stem surface of *Astrophytum* (Cactaceae) 75
Weibull frequency distribution
modelling the interactive effects of aluminum, cadmium, manganese, nickel and zinc stress using the 281
Westphalia, Northrhine
histological and biochemical differences of slightly and severely injured spruce needles of two stands in 163
Wheat
effects of water deficit on gas-exchange parameters and ribulose 1,5-bisphosphate carboxylase activation in 403
Wheat
foliar surfaces of ; retention, loss and translocation of radionuclides applied to 391
inhibition and recovery of photosystem II following exposure of , to heat shock 125
White pine, eastern
early effects of hydrogen fluoride on water relations, photosynthesis and membrane integrity in , (*Pinus strobus*) seedlings 377
Whole-canopy cuvettes
measurement of canopy gas exchange of kiwi fruit vines using a suite of 425
Xylem/symplast interface
effects of lead, cadmium and zinc on the electric membrane potential at the , and cell elongation of *Impatiens balsamina* 439
Zea mays L.
the use of lanthanum to delineate the aluminium signalling mechanisms functioning in the , ... 365
Zinc
effects of lead, cadmium and , on the electric membrane potential at the xylem/symplast interface and cell elongation of *Impatiens balsamina* 439
Zinc stress
modelling the interactive effects of aluminum, cadmium, manganese, nickel and , using the Weibull frequency distribution 281
Zucchini squash
differences in nuclear magnetic resonance images between chilled and non-chilled , ... 213
